

# 2012 Service Value Plans

You currently protect yourself with life insurance, car insurance, and business insurance. TwinBytes Inc. gives you that piece of mind for your business computers by regularly monitoring your computer systems and informing you of anything unusual. Not all issues are visible. Your computers seem to be fine, meanwhile someone is quietly stealing your identity, hacking your bank account, or planting other spyware.

Why you should take advantage of one of our service plans:

- ◆ Our regular monthly check-ups include inspection of your software, security, backups, and general security, stability and performance of your computers.
- ◆ We had clients say they currently have no issues or signs of trouble. On a quick scan, we found traces of spyware, hijackers, malware, Trojans and more.
- ◆ You will receive all our services at a highly reduce rate. **Save 21% OFF**

Choose the package that fits your business' needs...

## Bronze
